

# Pitch a Project

John Diefenbaker had a vision for a better Canada that was built on projects involving diversity, unity, communication, and giving voice to those not heard. Some of these projects included better road transport to the north and more diverse people represented in government. If you were a leader in your community or school, what project would you do to make it a better place? Draw it out below and think of how you could accomplish this? What and who will you need?
