

Paper Chains

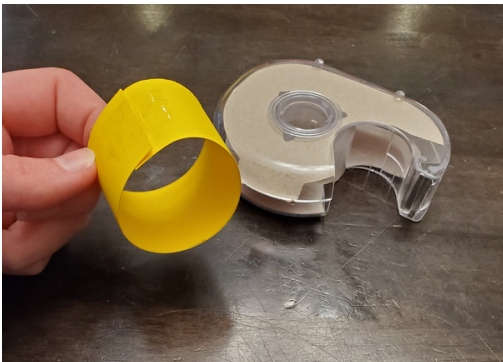

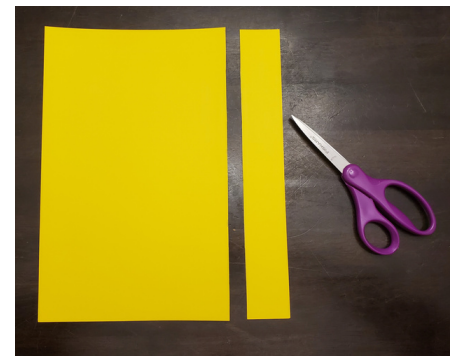

Materials:

- Construction paper
- Tape or a glue stick
- scissors
- ruler
- pencil

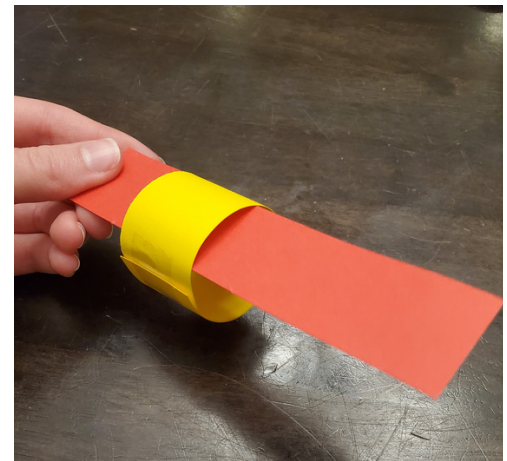

1. Take a piece of construction paper and measure out strips on 3 cm across with a ruler and a pencil

2. Cut out the strips and then cut each strip in half again

3. Start with one strip and roll into a cylinder. Tape or glue it shut. If the paper is heavier you will need to tape it.

4. Take the next strip of paper and pull it through the cylinder you just made. Make another cylinder so it interlocks the previous one and tape or glue shut.

5. Repeat these steps until your paper chain is as long as you wish
